

Abstract:

LIQUID CLEANING COMPOSITONS AND THEIR USE

5 An aqueous liquid cleaning composition having a pH of at
least 7, preferably from 7 to 11, more preferably from 7
to 10 and comprising from 1% to 90% by weight of
surfactant, a proteolytic enzyme and a primary stabiliser
therefor, the composition further comprising an organic
10 substance which forms a complex with a transition metal,
the complex being capable of catalysing bleaching of a
substrate by atmospheric oxygen.
